Refer to the adhesive manufacturer's instructions for comprehensive installation instructions.

<sup>1</sup> Applies to edge seaming. Color and opaque add-on layers must be removed from the surfaces that are to be bonded. Specification of Illume Film is not advised for panels to be edge seamed.

<sup>2</sup> Wall substrates should be primed / sealed. Drywall is not a preferred substrate for bonding panels above 1/4" in gauge.

<sup>3</sup> FRP adhesive is not advised for use on panels with Reflective Finishes. Complete installation instructions can be found at [www.lumicor.com/images/Wall\\_Protection/wp\\_installation.pdf](http://www.lumicor.com/images/Wall_Protection/wp_installation.pdf).

It is not advised to bond Lumicor panels when Illume Film is specified (i.e. Lumiform with Illume Film Add-on).

Do NOT abrade Reflective Finishes to promote adhesion.

Please test your adhesive to determine suitable bond strength and aesthetics before adopting on full scale.
