DRILLING - RECYCLED GLASS™

RECYCLED GLASS

HELPFUL HINTS

Use these drill bits and directions when drilling holes in the Recycled Glass products:

- Always practice several holes on remnant or sample pieces.
- Always use air to remove acrylic dust and shavings to prevent melting.

INSTRUCTIONS

1. Clamp the part securely to a wooden backer.
2. Only use a spade shaped glass bit at low RPM's, (approximately 250-350 RPM).
3. Drill all the way through the sheet.
