

CARE & HANDLING

The following are guidelines and recommendations to keep your Kuvio walls beautiful. Our pre-finished products use the highest quality 3D laminate material and our laminating process results in a seamless surface that both looks realistic and is resistant to chipping, cracking and most household chemicals. For easy cleanup, just wipe with a damp cloth and a mild detergent.

Clean all spills immediately using a soft cloth and clear water. The surface resists many common household substances, and most will wipe clean with a damp cloth or sponge.

Remove oil, grease, or other general soil that does not respond to water alone with a non-abrasive cleaner. Tough stains may be cleaned using a soft cloth dampened with a “409” or “Simple Green” type cleanser. **Cleaners with acetone, ethyl alcohol or mineral oils should not be used.**

Do not use harsh detergents, abrasive cleaners, or bleach, as these substances can damage the laminate surface and impair its protective qualities.

Do not use your dishcloth to clean or dry the product. It may contain remnants of detergents and grease.

Do not wax or polish the surface of the tiles.

A furniture polish spray may be used after cleaning to remove any streaking and enhance the color of the finish, especially wood grains.

Keep Kuvio products out of direct sunlight or close curtains during the sunniest part of the day. Direct sunlight will cause the finish to lighten or darken over time.

Avoid exposing the products to very hot environments (130° F max). Extreme heat can cause the finish to delaminate or peel.
