LUMILIGHT
Innovative Illumination

LUMILIGHT | PRODUCT OVERVIEW

Lumilight is designed to emit a bright, even output of light across the entire surface of our Lumicor resin panels.

Unlike traditional panel lighting that requires the use of large frames to house florescent tubes, Lumilight integrates high output LEDs with a light guiding grid into an acrylic sheet, making it possible to create an elegant, frameless lighting solution.

LUMILIGHT | APPLICATIONS

Choose Lumilight for backlighting or uplighting Lumicor's translucent resin panels. Lumilight will provide countless options for your next project whether you require a soft glow, a crisp backlit digital print or custom interior signs.

Lumilight is an excellent solution for countertops, interior signage, retail displays, wall applications, desk wraps – anywhere you want to make a statement.

V-GROOVE
GRID PATTERN

LEDS

Lumilight utilizes crystal clear acrylic etched with a patented V-groove grid pattern that refracts the light to provide even illumination across the panel.

KEY FEATURES

- Uniform illumination across panels
- High output LEDs
- Dimmer switch included

- Superior, consistent light quality
- Uses 70% less energy than fluorescents
- Advanced 3-year warranty

HIGHLY CUSTOMIZABLE

- Design custom shapes and forms
- Use with or without framing

- Excellent choice for signage
- Create any color of light
