DARK MATTER

Star Light, Star Bright

The out-of-this-world Celestial collection features fresh metallic décors inspired by our colorful, dazzling universe. From Nova's sunny shine to Galaxy's holographic shift, each color of shimmery glitter scatters across Resin Panels in starry ribbons like constellations in the night sky.

Uniquely Yours

Whether you need to integrate a sophisticated solid surface into an existing space, create a contemporary feature at the center of a new construction, or anything in between, use finishes and add-ons to tailor Celestial décors to your designed environment.

This striking collection pairs perfectly with Luminous colors and Opaques, from subtle tone-on-tone palettes to bold combinations reminiscent of the night sky.

Choose a Gloss finish for the most sparkle, or specify Matte for a softened metallic glow. Various finishes are available to achieve just the right level of shine.

DESIGNER NOTE

“I was inspired by the idea of sparks frozen in motion and tiny bursts of flickering light. Celestial really delivers the scintillation and sparkle we were after, and we were amazed to see the texture and depth it brings to our panels.”
