LUMILIGHT BY LUMICOR

Lumilight is designed to emit a bright, even output of light across the entire surface of Lumicor Resin panels. The ultra-slim profile of Lumilight allows for use across all types of applications and is ideal for countertops, retail displays, wall applications, desk wraps, ceiling features and much more. Highly customizable, Lumilight can provide countless options for your next project.

SUPERIOR LIGHT QUALITY

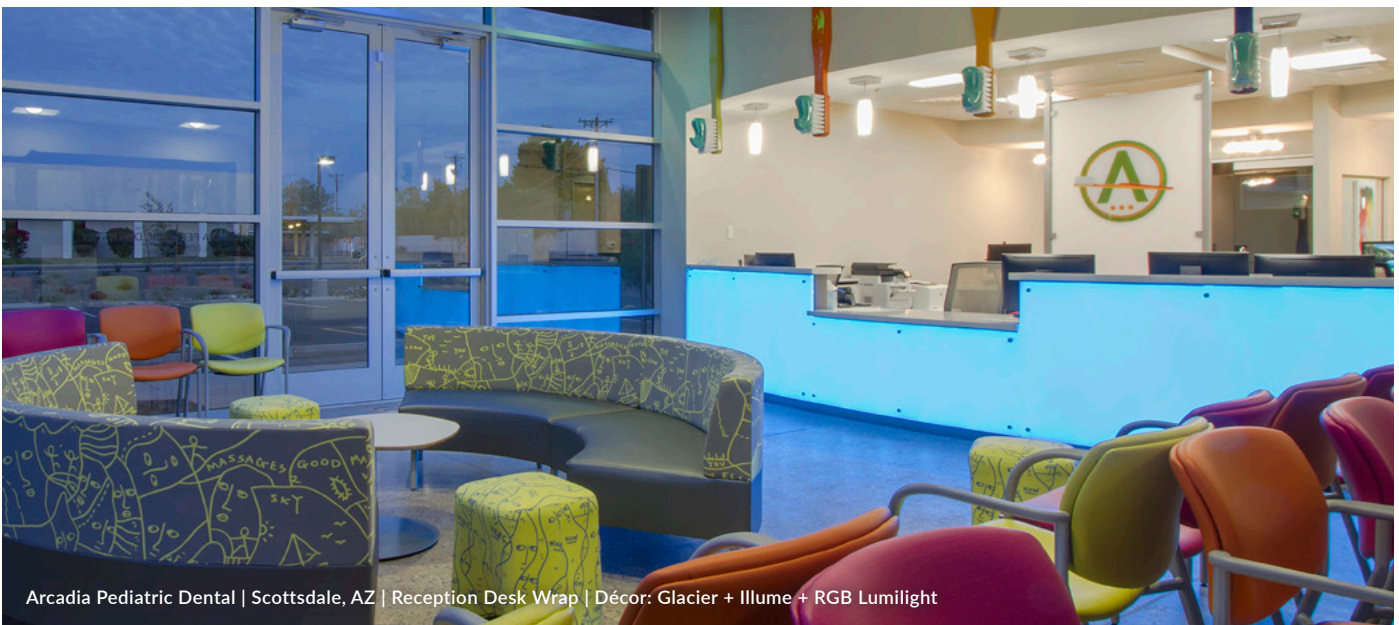

Lumilight uses high output LEDs to create uniform illumination across panels for superior, consistent light quality. The LED lights are incredibly efficient, using 70% less energy than fluorescents and have a lifespan of 70,000 hours.

CUSTOMIZE SHAPE & SIZE

Lumilight can be cut into custom shapes and sizes, from as small as 2"x 2" to as large as 48"x 96". The slim profile of our integrated LED light panel allows for frameless applications or use of a snap-in designer frame.

CREATE ANY COLOR OF LIGHT

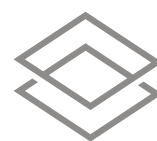

Lumilight can be specified as RGB to create any color of light or choose between various white light color temperatures, ranging from warm to cool. For maximum versatility, the dimming capabilities of Lumilight can create anything from a soft glow to a bright, crisp backlight.
